STRATHEX SWITCHYARD

SXSY-B122

OPERATOR QUICK GUIDE

22 controls. 65 settled chord behaviors.

111 intentionally unassigned combinations.

The keyboard signals intent. The host grants or refuses authority.

PRE-HARDWARE EDITION - PHYSICAL POSITIONS AND DEVICE IDENTITY REMAIN UNCOMMISSIONED

SXSY-B122 / AGENT CONTROL PLANE I

A01 RE-ANCHOR

N: Safely re-anchor the active agent to scoped authority and evidence.

A02 PROOF

N: Request evidence-based self-verification.

S: Request a cross-backend adversarial review.

A03 OPTION PROVIDER

N: Request five options and one recommendation.

S: Request one numbered packet for pending decisions.

A04 PLAN EXPANDER

N: Request fifteen ranked creative alternatives.

A05 PLAN APPROVAL

N: Route an already-approved plan to the selected session.

SXSY-B122 / AGENT CONTROL PLANE II

A06 HANDOFF

N: Prepare a planner-to-coding-agent context transfer.

S: Queue a blocker or decision packet.
A: Focus the planner with the packet.
S+A: Toggle queued versus immediate-focus handoff.

A07 FIND BLOCKED

N: Focus the next verified blocked managed agent.

S: Open the blocker queue.

A08 FIND FINISHED

N: Focus the next verified finished managed agent.

S: Open the done queue.

A09 AUTHORITY REFRESH

N: Replay existing scoped authority to the active agent.

S: Prepare a reviewed individualized broadcast.

A10 COUNCIL

N: Report verified cross-agent conflicts and dependencies.

S: Automatic partitioning and isolation (Council automatic mode). [GATED]
A: Propose one coordinated plan for explicit approval.

SXSY-B122 / WORKSPACE COMMAND BAR I

W01 CLAUDE

N: Open or focus Claude Desktop.

S: Open a fresh Claude surface.
A: Open a managed Claude Code terminal in VS Code.

W02 CHATGPT

N: Open or focus ChatGPT Desktop.

S: Open a fresh ChatGPT surface.
A: Open a managed Codex terminal in VS Code.

W03 VS CODE

N: Focus the last-used VS Code window.

S: Open a new VS Code window.

W04 TERMINAL

N: Open or focus an external terminal.

S: Open or focus the VS Code integrated terminal.

W05 COMMIT

N: Preview the Compound local-commit workflow.

S: Preview PR upsert after explicit review.
A: Broker-enforced exact-head PR merge. [GATED]
S+A: Broker-enforced guarded Direct Main. [GATED]

W06 GITHUB

N: Open the repository home.

S: Open the current-branch PR or PR list.
A: Open repository issues.
S+A: Open the current-branch Actions run or list.

SXSY-B122 / WORKSPACE COMMAND BAR II

W07 COMPOUND

N: Capture one durable learning.

S: Preview learning-store refresh scope.
A: Open the Compound workflow palette.
S+A: Guarded full lfg loop. [GATED]

W08 RUN

N: Run the selected configured target.

S: Debug the selected configured target.
A: Stop a managed run process.
S+A: Start a managed web app and offer its verified local URL.

W09 VOICE

N: Open the two-way voice center.

S: Choose the Claude or ChatGPT provider.
A: Bind voice only to a selected managed VS Code agent.
S+A: Open the voice session picker.

W10 PIPELINE

N: Show non-mutating pipeline status.

S: Run a local gate through the test-environment broker.
A: Diagnose the selected failure.
S+A: Reproduce cleanly through the test-environment broker.
C+S+A: Isolated Repair Mission. [GATED]

W11 SHIELD

N: Scan current changes using configured coverage.

S: Run a deeper codebase and history audit.
A: Run configured supply-chain audit coverage.
S+A: Prepare an exact-revision Release Shield receipt.
C+S+A: Containment release or emergency containment workflow. [GATED]

W12 SANDBOX

N: Create or enter a repository-local virtual environment.

S: Preview safe virtual-environment rebuild scope.
A: Create or enter a Full Sandbox. [GATED]
S+A: Rebuild a Full Sandbox. [GATED]
C+S+A: Quarantine. [GATED]

SXSY-B122 / OPERATING BOUNDARY

MODIFIERS

N = normal. S = Shift. A = Alt. S+A = Shift+Alt. C+S+A = Ctrl+Shift+Alt. Ctrl, Ctrl+Shift, and Ctrl+Alt are intentionally unassigned on every control.

NO AMBIENT AUTHORITY

A chord never authorizes a repository mutation, credential use, prompt submission, merge, push, force action, containment release, or agent approval. The mediated host must still resolve the exact target, authority, confirmation, and current evidence.

GATED CONTROLS

Council automatic mode, PR merge, Direct Main, full lfg, Repair Mission, emergency containment, Full Sandbox, rebuild Full Sandbox, and Quarantine remain blocked until their acceptance evidence is current.

STOP MEANS STOP ONLY WHAT SXSY OWNS

Managed Stop may target only a process registered and launched through SXSY. It must not infer a PID from a window title or terminate an unrelated terminal.

PHYSICAL COMMISSIONING

Do not install a udev identity, flash firmware, or mark a hardware gate accepted until the actual B122 has been identified, its factory Vial configuration preserved, and all 176 chord slots plus transport lifecycle cases have been observed.

PRINTING

Print A4 at actual size / 100%. Measure the 15 mm reference box. The A01/W01 identifiers are logical documentation order, not matrix coordinates or final within-bank positions.
